HM-001 - Unique position-ID label experiment

EXPERIMENTAL ONLY - NOT a replacement for the confirmed demonstration.

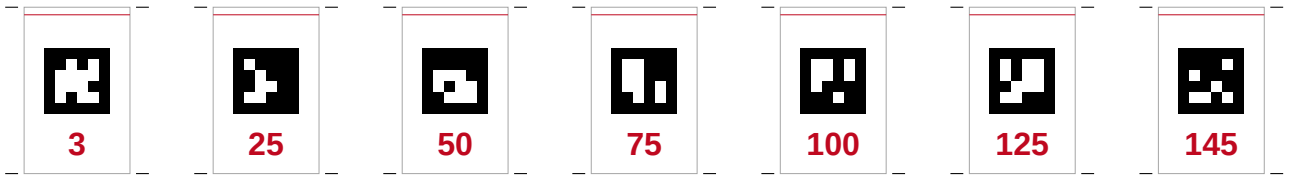

Profile: N15-25-UID1-EXPERIMENTAL

Print at 100% / Actual size. Disable Fit to page. Verify the 50 mm ruler below.

Each cut label is 14 x 22 mm. Black marker side: 8.7 mm.

Position is encoded in the marker ID; red numbers are for human placement.

Place the baseline at the printed tape position. Do not overlap or mix profiles.

ID 223 ID 66 ID 12 ID 22 ID 23 ID 71 ID 119

Read this kit QR first (a separate profile; legacy kit QR is rejected):

HM001:KIT:N15:25:UID1

No copy protection, licence validation or authenticity proof is provided.

ID decoding alone does not correct perspective or garment depth.

50 mm print-scale check

Use a separate test tape. Existing labels, approved PDFs and demos stay unchanged.

Stop when: too few markers, unknown/mixed IDs, duplicates, low pixels or bad geometry.

Physical measurements and actual device behaviour have not been validated.
